

# Furkan Taş

## Frontend Developer

### Contact

#### Phone

+90 536 916 4864

#### Email

furkannntas@gmail.com

#### Address

Sarıyer / Istanbul

### Education

2020

#### Medipol University

Computer Programming

### Skills

- Html5
- Css
- Javascript
- React.js
- Next.js
- Github

### Experience

Jun 2022 - Dec 2022 ( 7 months)

Vigo

#### Fleet Manager

I have taken an active role in critical processes such as vehicle tracking, maintenance and leasing and ensured that these processes are managed effectively. I also have a strong ability in data analysis and human relations. I work passionately to increase operational efficiency and manage all processes smoothly.

Jul 2020 - Jan 2021 ( 7 months)

Molino Cucina

#### Fleet Manager

I have gained a variety of experience in different sectors, especially in positions such as courier tracking, customer representative and assistant cook. My experience in these different fields has helped me to build a general range of competences and develop a variety of skills. I am currently looking for a career in the software industry that I am interested in and would like to explore opportunities in this field. I am open to innovation, willing to learn and like to work in a collaborative way

Jul 2019 - Sep 2019

Hipermedya Ajans

#### Junior Developer

I worked as an intern at hipermedia company and during this time I gained skills in querying and setting up SQL databases, inputting content into websites. I updated the content of websites using my practical knowledge of dynamic content management and this experience helped me develop my skills in optimising the user experience. I also gained practical knowledge of SQL database and learnt how to store and query data effectively. As a hardworking, open to learning and team-oriented intern, I look forward to opportunities to gain more experience in software development.

Projects I contributed to; - TİKAD(Business Women Association of Turkey) - <http://www.tikad.org.tr/> User Interface Improvements: To improve the user experience, I contributed to a more user-friendly and intuitive interface design. Visual Changes: I contributed to the visual design, updating the colour palette, fonts and general design elements.-YSS(YavuzSultanSelimBridge) - <https://www.ysskoprusuveotoyolu.com.tr/TR/ihlalli-gecis-sorgulama-ve-online-odeme>

Animations and Transition Effects: By adding animations or transition effects to some elements on the page, I made the user experience more engaging.

Visual Changes: I contributed to the visual design, updating the colour palette, fonts and general design elements. Writing Queries: Creating and optimising SQL queries. I contributed to operations such as pulling, updating, adding or deleting data from the database

The following comments were made by **Hakan Mehmet Sözbir**, Design Supervisor, upon my request  
09.008.2023.

"Although Furkan is still a beginner, he stands out with his passion for software development and his ability to learn quickly. His constant endeavour to improve his technical skills and his willingness to do research to understand new topics clearly shows Furkan's potential."

Jun 2023 - Aug 2023

Bilge Adam Akademi

## Frontend Development

- HTML, CSS and JavaScript and React.js were used for projects with responsive design. Music & Movie Playlist with Redux Toolkit Some of the key features of this app:
- Adding and removing songs and movies from playlists Generating random songs and movies to add to playlists Clearing all the playlists at once.
- Displaying the current contents of each playlist in a list format allowing users to interact with the app using buttons and other UI elements. Overall, this app provides a simple and intuitive interface for managing playlists, and could be useful for anyone who wants to organize their favorite songs and movies into separate lists. GitHub User Search
- Integration of GitHub user public API
- Execution of API queries using JavaScript Fetch API Quote Generator
- Integration of public API
- Execution of API queries using react hooks - useEffect
- State management with react context React Context API
- Extensive state management with React Context

The following comments were made by Instructor **Murat Akdağ** upon my request 09.08.2023

"On BilgeAdam, we worked together with Furkan to solve frontend problems. We use react, nextjs, typescript, javascript and tailwind as frontend technologies. We worked hard and focused. He is kind and humoristic team member. He likes to solve problems and learn new things.

As a frontend developer, Furkan always showed 100% success in our sprints. He has trustable javascript and react.js skills and always looking for new frontend technologies to develop himself further. He never complained about the tasks or the situations and always finished his duty on the time. Thus he is really careful about deadlines and developing progress. He is a good team-player that I am so satisfied to work with him.

Please let me know if you have any further questions regarding the above information."
